*November 2013*

CEAM Foundation, from 2009-10, has taught four courses in the **Master's Degree in Pollution, Toxicology and Environmental Health**. The subjects taught are:

- Effects of pollutants
- Climate change and carbon cycle
- Pollutant processes
- Laboratory of Pollution

In these subjects the CEAM Foundation teaches theoretical and practical knowledge in which it includes the latest science on which scientists of CEAM work within the scientific community at the European and Global level.

In addition, during the course 2013-14, the CEAM will be mentor of the following Master's Thesis Works:

- Experiments on Ozone-Nitrogen interaction on leaf crops.
- Experiments of biomarkers in the city of Teruel.
- Development of preprocessors for atmospheric dispersion modeling of pollutants.
